

NURSING

The happiness of caring
for his wellbeing

Chicco: the Happiness Specialist.

Behind a smile there is much more:

*the expertise we developed by observing a baby and its world,
almost 60 years experience built from
a constant dialogue with parents,
the collaboration with world experts in baby care.*

The responsibility to contribute to the baby's happiness.

Because happiness is a serious matter.

Chicco supports parents and their children with products developed from their unique experience in baby care, to sustain and support them everyday through a happy path to growth.

Our values:

Bonding

Chicco knows how to work alongside mothers and children because it is fully aware of how important the bond that develops and grows between them is and aims to offer solutions that support and facilitate a positive relationship.

Spontaneity

Chicco knows that it is thanks to spontaneity that children discover the world and this is why it aims to allow them to freely express themselves whatever the situation.

Simplicity

Chicco provides mothers and children with simple solutions to improve everyday life.

Creativity

Chicco gives children the freedom they need to express their imagination and enhance their desire to experiment. This is why it aspires to provide mothers and children with state-of-the-art solutions.

Positivity

Chicco knows how much a smile is worth, how important a serene and secure environment is for a baby. This is why it provides mothers and children with solutions that fill everyday life with moments of harmony and positivity.

Growth

Chicco knows that growth, for children, is a natural and instinctive strive towards the future. And also knows how important it is for their mothers to help them grow up happily. This is why it provides solutions that instil a sense of trust and security.

Accessibility

Everyone deserves a bit of happiness and Chicco knows that. This is why it designs products aimed at fulfilling the needs of all mothers and children.

Chicco's vast experience in the infant world has now been consolidated by an Observatory facility, [dedicated to increasing our knowledge of children of from 0 to 3 years of age](#) and their psycho-physical, emotional and social needs. The first few years are a vital period for the growth of all children, a period which is full of significant changes and physical and psychological needs, for them and their families. Only by observing all these aspects very closely, and in particular the spontaneous behaviour of children, we are able to fully comprehend their actual needs. This is why the Osservatorio [collaborates with experts in the medical-scientific world](#), which is vital in order to keep up to date with the knowledge and progress made in the pediatric field, and to assess the scientific value of the proposed products; it communicates with the education facilities and constantly [gathers suggestions from mothers and fathers](#), those who have hands-on experience of what their child need. The commitment of the Osservatorio is to gain as much knowledge as possible on the world of children, and use it to devise and develop specific solutions for each growth phase.

Know-how

Constant observation of children and the world they live in.

Scientificity

Collaboration with the medical world.

Experience

Ongoing dialogue with parents.

Responsibility

Because the happiness of children is a serious issue.

These are our values.
This is the [Osservatorio Chicco](#)

NaturalFeeling

New Manual Breast Pump

Gentleness and effectiveness all in one, for a long lasting and peaceful breastfeed.

Breastfeeding is always recommended, as mother's milk has everything baby needs to grow up well. The new Chicco Manual Breast Pump goes along with you in this experience with all the gentleness and effectiveness you may need.

Effective and gentle expression thanks to the exclusive *Chicco System*.

Maximum comfort, thanks to the ergonomic handle.

Maximum gentleness on the breast, thanks to the extremely soft and textured silicone cup.

Made in Italy with safe materials.

*92% of mothers have given positive feedback on effectiveness and 89% have given positive feedback on overall comfort (2013 market research: Italy, 110 mothers. Data available from Artsana S.p.A.).

**In accordance with legislation in force.

Manual Breast Pump

New Chicco Manual breast Pump allows mothers to express their precious milk in an effective and gentle way.

The comfort is guaranteed by the ergonomic handle and the gentleness by the soft silicone cover cup which fits all breast sizes. The package comes with the new teat of Step Up New line, which thanks to the specific shape allows you to feed in a natural way, encouraging the breast and bottle feeding.

EFFECTIVE AND GENTLE EXPRESSION

thanks to the innovative Chicco System, which makes expression even more simple and natural.

ERGONOMIC HANDLE

for maximum comfort during use, thanks to the shape and the soft cover of the handle.

EXTRA SOFT SILICONE CUP

for maximum gentleness on breast, thanks to the soft texture which wraps and massages the breast

Electric Breast Pump

The Portable Electric Breast Pump is specifically designed to extract milk as gently as possible. Mums can select the suction intensity and frequency that most suits the needs and physiology of their breasts. Furthermore, thanks to the exclusive memory function, when the breast pump is switched on, it will automatically set the last used suction frequency. The soft Silicone membrane adheres perfectly and gentle massages the breast. By fitting the ring and the physiological teat on the bottle, the milk can be fed directly to the baby. The portable electric Breast Pump runs on either 1.5V AA alkaline batteries (not included) or connected to the mains via its own adaptor.

Manual Breast Pump

CLASSIC BREAST PUMP

The Classic Breast Pump is easy to use and extracts the milk quickly and efficiently.

It has a suction rate control system which makes the pump work faster or slower as desired: this guarantees gentle and delicate extraction without painful tugging on the nipples.

If you wish to feed baby immediately, fit the ring and the Wellbeing teat, included in the package, to the bottle.

Ref 00002825000000
Inner Box 1 pc

FAST-FLOW GLASS BREAST PUMP

Made of hygienic and sterilisable heat-resistant glass, it is extremely practical because it has very few components.

By fitting the ring and soft, natural silicone teat (included in the package) to the threaded, you can use it as a practical feeding bottle.

Breast Pads

During breast-feeding, especially during the most delicate, initial phases, annoying irritations to the breast or raghades, require particular care and hygiene. The special antibacterial fabric prevents the proliferation of bacteria inside the cup, while providing an appropriate mechanical barrier for protecting the breast. The super absorbent micro-pearls retain liquid and prevent it from seeping out to the surface, always keeping the skin dry. The external breathable layer allows the nipple and skin to breathe and prevents irritations. Furthermore, the extra thin layer makes the nursing pad invisible under the clothes. The practical adhesive strip and the anatomical shape keep the nursing pad firmly in place when worn.

WITH ANTIBACTERIAL FABRIC

- Avoids the proliferation of bacteria on the skin of the breast, preventing irritations and raghades.
- Keeps the breast in the ideal hygienic conditions that help healing.
- The antibacterial molecule of the treatment is not transmitted to the skin of the breast, and therefore does not comes in contact with the mouth of the baby.

SUPER ABSORBENT

The super absorbent micro-pearls retain liquid and prevent it from seeping out to the surface.

INVISIBLE

Thin and invisible under clothes, maximum comfort in every moment.

MAXIMUM BREATHABILITY

The double external layer in breathable non-woven fabric allows the nipple and skin to breathe and prevents irritations.

TESTED IN NEONATAL CLINICS AND DERMATOLOGICALLY TESTED

A clinical test carried out at the Mangiagalli Clinic in Milan has shown that the use of the Antibacterial pads avoids irritations, raghades and mastitis. Dermatologically tested, for maximum gentleness on skin.

NATURAL LATEX RUBBER NIPPLE SHIELDS

In soft, elastic pure natural latex rubber, they protect irritated nipples, alleviating pain and allowing breast-feeding even in the case of flat nipples.

The practical and sterilized little container allows you to store the product when not in use. Available in 2 sizes: Small and Large.

Ref: 00002252000000 (small)

Inner box: 6 pcs

Ref: 00002254000000 (large)

Inner box: 6 pcs

SILICONE NIPPLE SHIELDS

In soft, fine silicone rubber, they protect irritated nipples and permit breastfeeding in even cases of flat nipples. The teat with ribbed rings reproduces the natural texture of the maternal breast; the shaped shield allows baby's tiny nose to come into contact with mother's skin. The practical and sterilized little container allows you to store the product when not in use. Available in 2 sizes: Small and Large.

Inner box: 6 pcs

Ref: 00002255000000 (large)

Inner box: 6 pcs

NIPPLE CORRECTOR

Nipple Corrector gently stimulates the extension of flat or retracted nipples, allowing baby to adopt a correct position and to continue breast-feeding.

Ref: 00002432000000

Inner box: 3 pcs

Breast Accessories

HYDROGEL SOOTHING PADS

The Hydrogel anti-ragades disks help you to prevent irritation or nipple lacerations. They alleviate pain, soothing, refreshing and protecting the nipple and areola, allowing you to continue breast-feeding. In case of ragades, they create the ideal condition that favors healing.

Ref: 00002256000000
Inner box: 4 pcs

BREAST SHELLS

The Breast Shells collect milk spills avoiding contact with the skin; the ventilation holes keep the skin dry while helping to heal nipple irritation or cuts. They help to eliminate excess milk flow, reducing breast congestion and help the extension of flat nipples. They have a soft, comfortable silicone membrane and anatomical shape.

Ref: 00002258000000
Inner box: 3 pcs

SURE-SAFE NURSING CLEANSING WIPES FOR BREAST HYGIENE

Sure-Safe Nursing Cleansing Wipes are enriched with wheat and milk proteins to help you maintain the natural hydrolipidic balance of the skin. Odourless and tasteless, they are completely safe for the baby and do not require rinsing. They do not contain tensio-active agents, perfumes, alcohol or colourings. The wipes can be used both before and after breast-feeding.

MILK CONTAINERS 0% BPA (4PCS)

The Natural Feeling milk containers can be used to store excess milk. The hermetic lid allows the hygienic storage of mother's milk. Made of unbreakable, light, easy to sterilize polypropylene, they can be stored in the fridge or freezer. The package includes the Chicco Natural Feeling OM+ ring and teat.

Ref 00002257200000
Inner Box 2 pcs

ANTI MILK RESIDUES FAST FLOW BREAST PUMP

The Anti Milk Residues Breast Pump. It is ideal for extracting the residual milk that the baby has not sucked during breast-feeding and that must be eliminated, or for emptying the breast in case of milk residues. The anatomical breast cup makes the pump easy and quick to use. The soft Silicone rubber membrane also offers maximum comfort when placed on the breast.

So close to you,
so natural for him.

Mother's milk is ideal for a newborn, but when breast feeding is not possible, then Step Up New is the best solution.

NaturalFeeling

Unique inclined teat,
ideal for newborns.

Rounded teat
perfect for the growing babies.

Elongated teat
designed for older babies.

Step Up New

The unique feeding bottle range which follows baby's growth in the most natural way.

Mother's breast adapts naturally to baby's sucking motion changes. Step Up New does it, thanks to three different and specific teat shapes, so feeding will be as natural as possible. Step Up New is the ideal choice to combine breast and bottle feeding.

New anti-colic system
prevents colics thanks
to the 2 valves.

Extremely soft silicone,
for the natural feeling
of mother's breast.

made in ITALY | 0%BPA* | clinically tested

Step Up New is made
of safe and clinically
tested materials.

* In accordance with legislation in force.

Well-Being Teats

Physiological Teat with Anti-Colic Valve

The Physiological Teat with Anti-Colic Valve is particularly soft and elastic, and simulates the physiology of the maternal breast as much as possible. It is intended for the feeding bottles and accessories of the Chicco Wellbeing Range. The white pack, identical to the related Feeding Bottles pack, makes it easy to identify on the shelves.

RIBBED RINGS

Increase the natural elasticity of natural latex rubber, allowing the teat to lengthen and giving it a texture similar to that of the maternal nipple.

SPECIAL LENGTH

Specifically designed to simulate the nipple during sucking: it lengthens twice as much with respect to its normal rest position.

ANTI COLIC VALVE

Avoids the swallowing of air and helps to reduce colic, hiccups and regurgitation.

LARGE BASE

Ensures maximum support for the baby's lips and helps sucking.

Weaning Taste the happiness together!

The weaning time provides the baby with more nutrients, but it is also an important step for his psychological, emotional and educational development, thanks to new food, new tastes, new textures and a new way of eating and drinking, gradually becoming more and more independent.

Chicco accompanies the parents and the baby with a complete line of useful and practical products, specifically designed to meet his needs day by day and to experience peaceful, happy meals together.

The baby needs his mum to be fed after feeding bottle or mother's breast.

The baby tries to drink with his own cup and to hold the spoon on, to eat the food with different textures.

The baby can independently eat and drink by himself at the table and on the go, properly using the instruments.

All the products' packs of weaning line show off and communicate the growing project that characterizes in a clear way the whole range of integrated products.

Cups

The cups line is studied to follow the baby's growth and to meet his needs during the learning to drink process.

Their innovative features help the baby to switch from sucking to drinking, becoming confident and independent. All these cups are BPA free, easy to clean and assemble, available in 4 colors.

6
m+

WEANING

12
m+

The pacifier plays an important role in the correct development of a baby's mouth, that is why it must be carefully designed to fit the child's mouth and ensure correct, evenly distributed pressure of the tongue against the palate. Moreover it reduces the risk of SIDS.

The ideal soother's teat should be:

- Orthodontic
- Physiological, designed with shape and features to not hamper the natural functions of the mouth.
- Thin at base, to prevent dental problems.

Chicco has developed the soother with an Orthodontic and **ACTIVE** teat that actively favours the correct development of the baby's mouth, thanks to the sum of its features:

DEVELOPED WITH LEADING ORTHODONTISTS

All Physio soothers with the same **ACTIVE** teat

Evolutionary teat

The teat comes in three different sizes, **0m+**, **4m+** and **12m+** to ensure that the soother is just the right size for the baby's mouth. The **4m+** teat has a gum massager ring that massages the gums during the delicate teething phase.

SOOTHING

High quality materials

LATEX

soft natural latex rubber, supple and resistant for a natural soothing feeling.

SILICONE

transparent and hygienic silicone, tasteless and odourless, does not age.

PHYSIO soothers are packed in a practical handy sterilizable case that can also be used as a handy carry case for travel (single and double version).

Completely soft, ideal also for naptime

The original **PHYSIO SOFT** by Chicco, is extremely soft and it does not bother the baby even when he is sleeping. It comes both in latex and silicone transparent and coloured.

Extra soft and gentle
on the skin

Breast-like base:
it allows the lips
to rest comfortably

Ventilation holes:
they allow air circulation
and prevent the gathering
of saliva

Extra ventilated, it respects baby's skin

PHYSIO AIR soother respects baby's skin, thanks to the several ventilation holes to ensure air circulation, preventing irritation due to saliva gathering and keeping skin free to breath.

Ergonomic shape:
it fits baby's face and ensures the correct space for the chin and the nose; with security ring

Anti-irritation holes:
they are studied to ensure maximum air circulation

Rounded edges:
they lay gently on baby's skin

STERILIZING & CLEANING

pure.bio

The line of **certified organic products**, to caress the baby in the most natural way.

Ecocert is one of the most relevant and well known control organization which ensures the quality and the respect of precise standards for Bio-Organic Cosmetic Products.

From the beauty of nature, **carefully selected and genuine ingredients** are combined with delicate scent, 100% natural origin. With Chicco pure.bio, you can nurture the baby's skin with **hypo-allergenic** and **dermatologically tested** products.

pure.bio products do not contain:

- Petroleum derivatives
- SLES
- Parabens
- Color additives of synthetic origin
- GMOs
- Phthalates

GENTLE BODY WASH AND SHAMPOO (200ML)

pure.bio Gentle Body Wash and Shampoo, with 100% organic Chamomile Water, has a mild and non-aggressive formula; it gently cleanses baby's skin, leaving it soft and smooth.

CHAMOMILE WATER:

softens and soothes even the most delicate skins

Other Ingredients:

linden water, rice proteins

99% of the total ingredients are from **Natural Origin**

10% of the total ingredients are from **Organic Farming**

Ref 00001258000000
Inner box 6 pcs

BODY LOTION (100ML)

pure.bio Body Lotion, with 100% organic Aloe Vera, with its renowned nourishing and regenerating properties, moisturises and respects baby's skin, thanks to its soft and delicate texture.

ALOE VERA:

softens and soothes skin, while stimulating epidermal growth and cellular repair

Other Ingredients:

jojoba oil, rice proteins, linden water, sweet almond oil, vitamin E

98% of the total ingredients are from **Natural Origin**

20% of the total ingredients are from **Organic Farming**

Ref 00001257000000
Inner box 6 pcs

Chicco pure.bio

MASSAGE OIL (100ML)

pure.bio Massage Oil, with 100% organic Sweet Almond Oil, has a light and delicate formula; it slides smoothly over baby's skin, providing the soft nourishment it needs.

SWEET ALMOND OIL:

emollient and cocooning properties, particularly suitable for sensible and dry skin

Other Ingredients:

jojoba oil, vitamin E, marigold oil

100% of the total ingredients are from **Natural Origin**

20% of the total ingredients are from **Organic Farming**

Ref 00001260000000
Inner box 6 pcs

PROTECTIVE BALM (75ML)

pure.bio Protective Balm, with 100% natural Shea Butter, has a rich and creamy consistency; it helps to reinforce the hydrolipidic barrier on baby's skin and protect it against dry patches and rashes, making baby skins ultra-silky.

SHEA BUTTER:

nourishes the skin and prevents skin dehydration, protecting it from external aggressions.

Particularly suitable for sensitive skin

Other Ingredients:

jojoba oil, sweet almond oil, linden water, vitamin E, rice proteins

98% of the total ingredients are from **Natural Origin**

20% of the total ingredients are from **Organic Farming**

Bath Accessories

Chicco's hygiene range provides a complete selection of all the products needed to wash and take care of your baby. The products are specifically designed for babies, paying attention also to colours and shapes to make daily washing and body care more enjoyable.

BATH TUB

Chicco Baby Bath Tub has been designed for baby's bath and is ideal from the first days of its life up to one year of age. Infants are supported between the legs with a safety stopper that prevents them from sliding into the water. It has a built-in plug for easy draining and two places for soap, sponges or other accessories. It is easy to clean and to move.

Not bulky (dimensions: 46 x 86 x 22 cm).

There are two washing positions:

with baby lying down, from birth up to 6 months of age

with baby sitting up, from 6 up to 12 months of age

Nasal Hygiene PhysioClean

Nasal hygiene is especially important in very young babies because in the first few months of life, a baby breathes mainly through its nose and doesn't know how to blow it yet. Babies cannot blow their noses and this affects their sleep, their feeding, and their own general comfort and that of their family. If baby's nose is blocked, he will suffer from a real discomfort when eating, drinking or sleeping. Chicco provides a complete range of products to take care daily of nasal baby's hygiene.

NASAL ASPIRATOR

Nasal aspirator allows the elimination of nasal secretions that can bother the baby. It offers an immediate solution for mothers to keep the nose unblocked and allow the baby to breathe freely, making it easier to sleep and feed. Its ergonomic shape with grip helps mother and the nozzles, made of soft and flexible materials, fit for baby's sensitive and delicate nose. The disposable nozzle, with pre-inserted absorbent filter, ensures maximum hygiene. It is a medical device.

Ref 00004904000000
Inner Box 6 pcs

TRADITIONAL NASAL ASPIRATOR

The nasal aspirator is ideal to free baby's nose from excess mucous, and especially for children who are not able to clear their nose independently. An unblocked nose makes breast-feeding and sleeping easier. The nozzles, made of soft and flexible materials, fit for baby's sensitive and delicate nose. They are disposable, with pre-inserted absorbent filter, in order to ensure maximum hygiene. It is a medical device.

Ref. 00004923000000

New Oral Care Line

Chicco presents the complete range of products to take care of baby's gums and teeth from the very first days, in an efficient and safe way. All the products are developed in collaboration with Osservatorio Chicco and experts, to satisfy the different specific baby's needs during growth. In particular the baby get used to dental hygiene in 3 steps:

0
m+

**Start taking care
of baby's oral
hygiene**

Stage 1

BEFORE TEETHING STARTS

During this period, it is a good idea for the mother to clean their baby's gums after each feed. Apart from creating a good hygiene habit, it will also make the baby comfortable with the cleaning process, which will help once teeth begin to show.

4
m+

**Start
familiarizing
with dental
hygiene**

Stage 2

WHILE TEETH ARE ERUPTING

The preparation stage for tooth eruption, is characterized by small but annoying problems such as swollen gums and irritability. Babies feel an increasing need to bite and feel relief thanks to teethingers.

6
m+

**Learn how to
brush teeth**

Stage 3

AFTER TEETH HAVE COME UP

At around 6 months of age the first milk teeth come through. Brushing should be done by the parent, presenting oral hygiene as a fun game.

Oral Care

Pediatricians recommend to start cleaning baby's gums after each feed to remove bacteria

BEGINNING SET

It contains the Fingertoothbrush, and the Gum Gel. The fingertoothbrush slips easily over an adult's finger and has extra-soft silicone bristles ideal to clean and massage baby's gums. The Gum Gel soothes baby's sore gums and has a sanitising action in the oral cavity. It is safe to swallow and without flavor.

Veste Asciutto

Veste Asciutto diapers are a simple and comfortable solution when changing the baby. Chicco diapers are slimmer and easy to wear and they allow the baby to move around freely whilst guaranteeing maximum levels of absorbance. The practical wings gently protect the baby, the soft side barriers prevent leaking and gently but firmly adapt to the baby's legs. The fabric-type external lining is breathable which keeps the baby's skin perfectly dry. It also helps to reduce heat and sweating which prevents rashes and irritation.

Veste Asciutto diapers are available in **five different sizes** to follow baby growth.

MANGIAPANNOLINI - DIAPER BOX

Chicco's "Odour-free nappy disposal bin" is a nappy bin which, thanks to its patented system, can be used with normal plastic bags, eliminating the added refill costs. Thanks to its patented "odour lock" system and the innovative seals used, the "Odour-free nappy disposal bin" prevents unpleasant odours from leaking out. Its convenience and ease of use make it safe, allowing the parent to hold the child even during changing. Once the bag is full, it is easily removed and thrown away, reducing the dispersion of unpleasant odours. The compact and space-saving "Odour-free nappy disposal bin" can hold up to 30 nappies*. Easy to wash. The use of a single bag significantly reduces plastic waste and simplifies waste collection and separation.

**The quantity may vary slightly depending on the size of the nappies.*

No refill costs
It uses normal plastic bags

Babies & Fever

FEVER: WHAT IS IT?

It is the increase in body temperature above normal limits, usually between 36.5° and 37.5°C and differs from person to person. Generally speaking, the body temperature is lowest in the morning and slightly higher later on in the afternoon; it also rises in some normal situations, such as an intense physical effort.

HOW TO MEASURE IT?

Taking children's temperature is not always as easy as it looks!

It is essential to use a specific thermometer, which has **functions and technologies designed to make it as less invasive as possible**. Infrared and digital technologies are the most suitable for taking the temperatures of babies and children. These devices allow you to take the temperature on various parts of the body.

Here's how to proceed:

DIGITAL MEASUREMENT

Underarm measurement. This is the most recommended method for children, even infants. Use a **digital thermometer**.

Skin temperature is influenced by external factors and the positioning of the instrument; ensure therefore that the skin under the armpit is thoroughly dry and keep the child still whilst taking the measurement.

Rectal measurement. Use a **digital thermometer with a flexible probe**. Lubricate the tip with vaseline or olive oil and whilst taking the temperature, try to hold the child still.

The rectal temperature is on average half a degree higher than the underarm readings.

INFRARED MEASUREMENT

Forehead measurement. This instrument quick and practical, must be used properly in order to get reliable results. Allow the temperature on the thermometer to adapt to the environment where the child is for about 20-25 minutes. Wait at least 5 minutes before taking the temperature for the second time, without holding the thermometer in the hand. Compare the reading with the child's normal temperature, measured with the same instrument in order to understand the magnitude of the difference.

Forehead measurement is on average half a degree higher than the underarm readings.

Ear measurement. Use an infrared thermometer. The sensor must be directed exactly on the eardrum: this means **it is necessary to "stretch" the pavilion of the ear**. Otitis or earwax can also alter the values. Remember to use a probe cover when using this type of thermometer.

Ear measurement is on average half a degree higher than the underarm readings.

Did you know?

Different measurement sites will give different readings and it is hard to make correlations which are significant and objectively valid for each person. It is therefore absolutely normal that body temperature taken orally will be different from an axillary measurement and it is wrong to compare the two.

| | | |
|----------|---------------|----------------|
| RECTAL | 36,6 - 38,0°C | 97,9 - 100,4°F |
| UNDERARM | 34,7 - 37,3°C | 94,5 - 99,1°F |
| FOREHEAD | 35,5 - 37,5°C | 95,9 - 99,5°F |
| EAR | 35,8 - 38,0°C | 96,4 - 100,4°F |

BABY'S WELLBEING

It is important to know that...

Temporal temperature is traditionally considered to be a valid indication of body temperature, due to the fact that a few mm under the skin of the temple area, there is the temporal artery which carries blood from the heart to the brain, where the hypothalamus is located as control centre for body temperature.

EASY TOUCH

Compact and ergonomic the infrared technology allows taking baby's temperature in just 5 seconds resting the thermometer on the child's temple and delicately massaging the area. Easy to use with just 2 buttons, one to turn on the thermometer the other to measure the temperature.

Rapid and accurate measurement

PISTON AEROSOL UNIT

Aerosol therapy is indicated for treating inflammation of the upper respiratory tract such due to colds and nasal congestion as well as inflammation of the lower respiratory tract (bronchi and lungs).

The Chicco piston aerosol unit nebulises all types of medications quickly and effectively and the nebulised particles are ideal in size which ensures the deep and targeted deposit of medications, maximising the effectiveness of the therapy.

The Sidestream phial shortens medication administration time by increasing the flow of nebulised particles, making therapy easier and more convenient for children.

It is a class IIa medical device which converts medications from liquid to aerosol form, so they can be administered directly to the respiratory system.

INDOOR PROTECTION

Chicco Baby Monitors are a very useful support for parents' need for closeness and tenderness with their baby. They allow to immediately understand when the baby is sleeping soundly or needs cuddles and **allow continuous contact at any time of day without giving up the quietness and freedom to feel safe at all times.**

Chicco is constantly evolving, changing to keep up with evolving lifestyles and trends.

Compactness, attractive design, ease of use and innovation are the characteristics of the models in the range.

Digital technology is the latest frontier in wireless communication and gives important advantages:

• **GUARANTEE OF PRIVACY:** the parent unit communicates only with the baby unit which is associated to.

NO INTERFERENCE: no audio-video interference caused by other appliances in the home or nearby. Thanks to this technology the baby control constantly verifies the connection between the units (child and parent) and automatically selects a channel.

• **WIDE RANGE OF ACTION:** the two units can communicate at a great distance

Five models answering to different needs.

TOP DIGITAL VIDEO

The **Top Digital Video Baby Monitor** allows you to stay in contact and communicate with your baby at all times thanks to the **two-way communication**. Using the large **touch screen display** (3 inch) you can access the menu and enlarge the image of the baby up to twice the normal size, thanks to the **video camera's digital zoom**, and allows you to set the date, time, **5 reminders**, **voice activation**, and to select the **brightness** of the image on the display. In addition, you can organize the unit's internal contact list in which you can store useful numbers. The baby unit allows you to play 6 stored lullabies or your preferred music by **connecting to an MP3 player** (not included), to display the **temperature** reading in the baby's room, and to reassure the baby during sleep thanks to the small **night light**. The ability to take **pictures and record videos** allows you to store and relive the most memorable moments of your baby's growth on the parent unit, and **download them on your laptop with the USB connection** (cable included).

The **digital technology** ensures **zero interference*** and **exclusivity of communication between the units**. Both units (parent and child) can operate with batteries (one rechargeable lithium battery included for the parent unit) or an AC adapter (two included).

*High immunity to interference caused by analogue devices.

** In optimal conditions with no obstacles

ESSENTIAL DIGITAL VIDEO

The **Essential Digital Video Baby Monitor** offers essential functions so you can see your child at all times, and stay in contact both when indoors and outdoors. Its large **2.4-inch display** and the **adjustable infrared video camera** (which also works in the dark) provide an excellent picture and perfect shot. The dual steady or variable intensity function of the small **night light** keeps the baby company while they sleep or just before. If **voice activation** is set, the parent unit will only be activated if sounds are detected by the baby unit.

The **digital technology** employed allows **interference-free reception*** and a high standard of privacy. Both units (parent and child) can operate with batteries (one rechargeable lithium battery included for the parent unit) or an AC adapter (two included).

*High immunity to interference caused by analogue devices.

** In optimal conditions with no obstacles

INDOOR PROTECTION

TOP DIGITAL AUDIO

The **Top Audio Digital Baby Monitor** allows parents to stay in contact with children and communicate with them thanks to **two-way communication**. A useful **support for organising the family's day**, thanks to its **5 alarms** that indicate when it is time for baby to eat, take medicine, visit the pediatrician, get changed and go to sleep, when transmission **between the units is active or not**. The **vibra-call function**, **voice activation**, the **date and time** of alarms can all be set via the **internal menu** on the parent unit. The **2 inch display** allows parents to **read the temperature detected in the baby's room** at any time. Babies can listen to their favourite music via **MP3 connection**. The **night light** soothes them while they sleep. **DECT digital technology** ensures zero interference and exclusivity of communication between units.

The **Top Audio Digital Top Baby Monitor** is **extremely compact and lightweight** through its use of a **lithium battery (included)** in the parent unit.

INDOOR PROTECTION

8 003670 746614

Ref 00002563000000
Inner box 3 pcs

Anti Darkness

Some psychological studies have shown the importance of colours and their effects on children. Already in its early months of life, the baby starts to prefer certain colours, like red, blue and purple. Their colour contrast attracts the most attention. The use of a flashing light facilitates a child's active participation at any age. The recommended position for placing the light source is behind the baby's cot.

MULTICOLOR LAMP RAINBOW

The Multicolor Lamp Rainbow entertains and reassures baby during the different phases of growth. It was developed thanks to specialist's suggestions. It entertains baby during the day thanks to the lights colours changing and it reassures baby during his sleeping time thanks to the night light. It has **8 different colours** of lights: **3 hot colours** (red, yellow, orange) and **4 cold colours** (green, light blue, blue, fuchsia) and a **neutral colour** (white) ideal for parents. Static colours reassure baby during his sleeping time and the colours alternation of hot colours and cold colours stimulates baby's attention.

MAGIC LANTERN

The Magic Lantern is designed to enhance baby with lights and sound. It comes with **5 light display effects combined with** a number of **different melodies** and soothing sounds of nature to comfort and cuddle your child in a calm, peacefully relaxing atmosphere. Children like the repetition of lights and sounds because it gives them security. From birth it is important to establish a pleasant and repetitive bed-time and wake-up ritual. The lantern's unique, soft shape enables it to rock to and fro gently, whilst its practical carry-handle makes it easy for your child to carry it around at all times.

Anti Darkness

INDOOR PROTECTION

Over the first weeks of life, light plays an important role in synchronising the biological clock and, therefore, the newborn's sleep-wake rhythm: in this regard, consider alternating light-dark to facilitate the settling of this rhythm. Keep the environment dark and relatively quiet during night-time sleep. A soft, low intensity light, positioned so that it cannot be directly gazed upon by the child, can reassure him if he awakens.

FIXED NIGHT LIGHT

The Sleep Well night lights project a soft light that reassure baby without disturbing its sleep. They use very little electricity (1W) and can be plugged directly into the mains socket.

- Soft light: Reassures baby without disturbing its sleep.

Ref 00006460100000

Inner box 6 pcs

8 058664 028986

NIGHT LIGHT WITH AUTOMATIC SWITCH ON/ SWITCH OFF

This night light with automatic on/off switch reassures baby at night time with a soft light. It switches on automatically in the dark, and it switches off as soon as the photosensitive cell detects sufficient light.

- Low power consumption led.

Cushions

Ergonomic

The supine position according to the recommendations issued by international medical experts, is the safest way for an infant to sleep to prevent SIDS (Sudden Infant Death Syndrome). The supine position, maintained for a long time, could flatten baby's head.

ERGONOMIC SELF-SHAPING PILLOW

The innovative technology, "memory-foam" of the visco-elastic material, reduces the pressure inflicted on baby's head whilst providing support. It is sensitive to body temperatures and adapts to the shape of the head distributing the weight evenly. Breathable material.

Pillow case: 40% Cotton 60% Polyester.

Padding: 100% Polyester

Measurements: 22 x 30 x 2cm

Ref 00000594000000

Safety Accessories

When baby begins to crawl and stand up and later walk, he becomes more and more curious about everything surrounding him. Children are unpredictable and fast. A moment of distraction, an oversight is enough for them to make a mess or run serious risks for their safety. For this reason, Chicco creates a complete range of safety products to avoid risks for baby indoor and outdoor.

Indoor

The home is the most important place for a family, but at the same time the love of a family, sometimes is not enough to protect a baby. It is really important to think about the safety of baby, using products that provide a safe home.

CHICCO PROVIDES SOLUTION FOR THE SAFETY INDOOR:

- To avoid baby can open wardrobe or drawers that should contain unsafely products as chemicals or medicines.
- To lock a door in order to avoid the risk of obstacles or being locked in a room.
- To prevent pinched fingers.
- To avoid baby plays with socket.
- To preserve his body by the shocks, protecting the corners.

Outdoor

Discover the world together with your baby is the most beautiful experience, but the outdoor environment could be present risky situations. In order to have always pleasant moments it is really important to prevent the possible outdoor unsafely.

CHICCO PROVIDES SOLUTION FOR THE SAFETY INDOOR:

- To preserve your baby against the risk of shocks.
- To protect your baby against the sun during your car trips.
- To protect your baby against nodangerous particles.

OUTDOOR PROTECTION

Chicco Anti-Mosquito

The natural shield to protect mother and baby from insects bites!

How can we protect our children from mosquito bites?

Most products on the market contain active ingredients of chemical origin. The most common ones Icaridin and Diethyltoluamide (DEET) are **not recommended**, even in very low doses, **for children younger than two**. Other products use Citronella essential oil that is commonly recognized for the protection of the skin against external agents.

Babies delicate skin needs to be protected using repellents with a **safe formulation studied specifically for infants and whose effect is attested**: even better if the active ingredient is of **natural origin**.

The Chicco Anti-Mosquito line is formulated to provide a **natural protection** from insects bites.

The active principle of vegetable origin is particularly suited for the sensitive and delicate skin of **newborns** and **pregnant women**. Chicco Anti-Mosquito is a Medical Surgical Product, it ensures a **complete, safe and effective** protection during day and night.

Chicco Natural Active Ingredient

The active ingredient in the Chicco anti-mosquito products is the Eucalyptus Maculata Citrodiara extract, a naturally derived oil which is an insect repellent. This oil can be extracted from a particular species of Eucalyptus; the active content is naturally derived and the extraction process is **certified by ECOCERT** which guarantees the raw material conformity according to the natural and organic cosmetic standards.

Several studies, including a clinical study, have demonstrated a high efficacy of the Eucalyptus Maculata Citrodiara extract against a wide range of mosquitoes such as Culex Pipiens, Aedes Albopictus (commonly known as the **Asian Tiger Mosquito**), Aedes Aegypti (**the Dengue Mosquito**), Anopheles Albimanus and Anopheles Gambiae (the most important **vectors of malaria** in Africa, Central America and the Caribbean). Eucalyptus Maculata Citrodiara extract is also effective against a large scope of biting insects such as ticks, biting midges, horse-flies and stable flies.

The repellency of Eucalyptus Maculata Citrodiara extract has been proven to be similar to the synthetic materials currently used on the market (i.e. DEET) and some tests showed a significant superior efficacy compared to the most common natural active principles. Eucalyptus Maculata Citrodiara extract have been registered by the U.S. Environmental Protection Agency (EPA) and it is under registration to the European Biocidal Products Directive 98/8/EC.

- Trigg J., Hill N. (Department of Medical Parasitology, London School of Hygiene and Tropical Medicine) 1996. Laboratory evaluation of a Eucalyptusbase Repellent against Four Biting Arthropods. Phytotherapy Research.

- O'Shea K. (Chemion Technology Ltd) 2004. Citrepe® - A breakthrough in natural insect repellents. Cosmetics and Toiletries Manufacture Worldwide. Citrepe 75® is a trade mark belonging to Chemion Technology Ltd.

Chicco Anti-Mosquito:

Natural Protection

Most products on the market contain active ingredients of chemical origin. The most common ones Icaridin and Diethyltoluamide (DEET) are not recommended, even in very low doses, for children younger than two. **The active ingredient in the new Chicco anti-mosquito product line is of natural origin (Citrodiol)**, an extract of a particular species of Eucalyptus from Australia. Citrodiol is widely recognized for its excellent insect repellent properties. Its efficacy makes it one of the most reliable active ingredients the world over.

Delicate Protection

All the products in the new Chicco anti-mosquito product line have been dermatologically tested, thus they are safe and suitable for the most delicate skin. With **no added alcohol, colourings and parabens**, Chicco products are **specially adapted for children's skin**, for **pregnant women** and in general for all those who have specially **delicate skin**.

Day & Night Protection

The exclusive formula of the new Chicco anti-mosquito product line works efficiently both at night and during the day, providing **excellent protection against most common types of mosquitoes**, including the nasty and irritating **Asian Tiger mosquito** (*Aedes Albopictus*), increasingly found in many parts of the world.

Long Lasting Protection

The mosquito repellent effect of Chicco products lasts longer than most natural mosquito repellents on the market. **A single application will protect baby's skin for up to 3 hours.** When longer lasting protection is required, the product can be reapplied on exposed body.

Insect Protection

New practical bottles and dispenser to make it easier to apply the product also on small children!

ADJUSTABLE POST NATAL GIRDLE

In fine-knit lycra cotton enhanced by stretch lace inserts.

The sanforised cotton internal lining helps to support and shape the belly without "compressing" it.

The practical side panels can be adjusted on the hips with a velcro fastening which guarantees a perfect fit

The crotch is lined in 100% jersey cotton and the gusset has an adjustable fastener.

SHAPING POST NATAL GIRDLE

It is made from heavy duty shaping and sustaining stretch cotton jersey fabric. The stretch lace inserts add a very feminine touch.

The front shaping panel is made from stiff cotton and provides excellent support for the abdominal wall; the stretch waist band criss-crosses at the back and has two padded ribs which helps keep the back in the correct position.

The crotch is lined in 100% jersey cotton and the gusset has an adjustable fastener.

POST NATAL BELT

This belt is made from breathable fabric and is completely cotton lined, it is comfortable to wear and adjust thanks to its practical velcro fastener. The graduated stretch support effect allows maximum freedom of movement, whilst guaranteeing targeted compression of the tummy with no excessive pressure.

Highly recommended for the post natal period, it helps the belly regain its original shape.

SANITARY TOWELS

10

PCS

Post-Natal Sanitary Towels

Specifically designed for the post-natal period, they are softer, longer and wider than traditional sanitary towels. Made of 100% ETO sterilised cotton, they have internal layers of cellulose to offer maximum absorbance. They can be used with the Post-Natal Disposable Briefs.

PCS

Post-Natal Sanitary Towels

Specifically designed for the post-natal period, they are particularly long and large to ensure maximum protection. The special 3 layers make them even more absorbent and comfortable.

The upper surface, made of special non-woven fabric, is comfortable and hypoallergenic, and always leaves the skin dry. The middle layer has a filtering layer of pure cellulose, which distributes the liquid evenly on the absorbent surface, avoiding the concentration of liquid.

The inner layer holds the liquid inside through the highly absorbent cellulose wad, ensuring maximum comfort. They can be used with the Post-Natal Disposable Briefs.

Notes

Handwriting practice lines consisting of multiple sets of three horizontal dotted lines for tracing and writing practice.

Chicco Nursery keeps working on the continuous evolution of children's safety regulations, which in Europe regulate the design and production of nursery products. The constant technological development may therefore oblige us to modify our products during the period of validity of the catalogue. The details and indications provided are therefore non-binding.

Furthermore, due to printing process, colours and fabric might result different compared to the real items.

Availability of the products in this catalogue is subject, at all times, to our manufacturing capacity.

Regular supply of products is therefore dependant on manufacturing capacities.
